All four destinations still holding

Holding addresses					
Victims lost 1,082.65 BTC, of which 1,082.57 BTC reached these four addresses. The difference went to miners as fees during the sweep, so tracking is measured against what actually arrived here.					
LABEL	ADDRESS	BALANCE	REPORT	UTXOS	STATUS
Holding 1	bc1qq85v2c... 3fcu9r	562.02 BTC \$35,409,514	562.02 BTC	7	HELD
Holding 2	bc1qx76cae... htfhe3	398.48 BTC \$25,105,565	398.48 BTC	1	HELD

LABEL	ADDRESS	BALANCE	REPORT	UTXOS	STATUS
Holding 3	bc1q8jy96f... kwtp3q	89.62 BTC \$5,646,625	89.62 BTC	1	HELD
Holding 4 Unmoved collector remainder	bc1qnk4zh9... 8fecp0	32.45 BTC \$2,044,515	32.45 BTC	160	HELD

Movement feed

Outbound spends from the four holdings, then followed destinations (up to hop 2). Empty means funds have not left consolidation.

No outbound spends

All watched balances still match the post-sweep holding set.

Am I at risk?

Short checklist from Coinkite’s advisory. This tracker does not check your wallet — follow the official steps before moving funds.

LIKELY EXPOSED

Seed generated on Coldcard Mk3 firmware 4.0.1–4.1.9, or on Mk4 / Mk5 / Q before the July 2026 fixed releases.

LOWER RISK

At least 50 private dice rolls at seed creation, or a strong unique BIP-39 passphrase (not the device PIN). Still migrate when practical.

FIRMWARE UPDATE IS NOT ENOUGH

Patching does not repair an existing seed. Generate a new seed on fixed firmware and migrate funds carefully.

NOT THIS BUG

TAPSIGNER, Opendime, and Satscard use different codebases and are not affected.
