Movement feed
Outbound spends from watched holdings, then followed destinations (up to hop 2). Empty means funds have not left consolidation.

No outbound spends
All watched balances still match the post-sweep holding set.

Am I at risk?

Short checklist from Coinkite’s advisory. This tracker does not check your wallet — follow the official steps before moving funds.

LIKELY EXPOSED

Seed generated on Coldcard Mk3 firmware 4.0.1–4.1.9, or on Mk4 / Mk5 / Q before the July 2026 fixed releases.

FIRMWARE UPDATE IS NOT ENOUGH

Patching does not repair an existing seed. Generate a new seed on fixed firmware and migrate funds carefully.

LOWER RISK

NOT THIS BUG

At least 50 private dice rolls at seed creation, or a strong unique BIP-39 passphrase (not the device PIN). Still migrate when practical.

TAPSIGNER, Opendime, and Satscard use different codebases and are not affected.
