unthocks

If you got any email from any of your Cold Wallet brand, DO NOT open any link!

Especially if they be saying something like "your cold wallet is compromised click the link to save it" and then you will be directed to enter your seedphrase. So many people have fallen into this scam. Do Not care about it.

Any cold wallet companh will NEVER contact you like this.

It's also surprising how the scammers are smart to hide their email and make it as close as possible to each brand. Could be coldcard, coinkite, trezor, ledger, and else.

Just make sure your seedphrase NEVER enters any DIGITAL devices or INTERNET! Keep it safe. Add passphrase too if you understand passphrase. And learn how to use sparrow with your wallet.

And for more, learn the air gapped method.

Get your seed words somewhere far. So you will have time to think before typing them to any scam site. Don't throw away your crypto because 2 minutes of not thinking calmly

GUIDELINES

- Do not use URL shortening services: always submit the real link.
- Begging/asking for bitcoins is absolutely not allowed, no matter how badly you need the bitcoins. Only requests for donations to large, recognized charities are allowed, and only if there is good

Top 1% Poster

I would never receive any email nor a call from them because to buy one, I always use a temporary email, fake phone number, a nickname and my works address.

unthocks OP • 12d ago

I do agree, even company like trezor can get their cust data leaked

ELLIPALWallet • 12d ago

Good PSA. These emails work because they manufacture urgency, a "compromised wallet" feels like something you must fix in the next five minutes.

unthocks OP • 12d ago

Yes, psychologically will affect someone

JoyceBurgin • 12d ago

open official app yourself instead of checking through the email

No-Wrap3568 • 10d ago

I hope every new HODLer reaches this post or posts like these.

Always better if you can keep multiple backups that neither need you to write down your seedphrase nor store your entire seedphrase in just 1 component. You can type a seedphrase that you yourself don't know in the first place

Stay safe, keep HODLing folks!

- News articles that do not contain the word "Bitcoin" are usually off-topic. This subreddit is not about general financial news.
- Submissions that are mostly about some other cryptocurrency belong elsewhere. This subreddit is exclusive to Bitcoin.
- Promotion of client software which attempts to alter the Bitcoin protocol without overwhelming consensus is not permitted.
- No referral links in submissions.
- No compilations of free Bitcoin sites.
- Trades should usually not be advertised here. For example, submissions like "Buying 0.2 BTC" or "Selling my computer for bitcoins" do not belong here. [/r/Bitcoin](#) is primarily for news and discussion.
- Please avoid repetition — [/r/bitcoin](#) is a subreddit devoted to new information and discussion about Bitcoin and its ecosystem. New merchants are welcome to announce their services for Bitcoin, but after those have been announced they are no longer news and should not be re-posted. Aside from new merchant announcements, those interested in advertising to our audience should consider Reddit For Business advertising system.
- Do not post your Bitcoin address unless someone explicitly asks you to.
- Be aware that X, YouTube, Facebook, Instagram, etc. are full of impersonation.

DOWNLOAD BITCOIN CORE

Bitcoin Core is the backbone of the Bitcoin network. Almost all Bitcoin wallets rely on Bitcoin Core in one way or another. If you have a fairly powerful computer that is almost always online, you can help the network by running Bitcoin Core. You can also use Bitcoin Core as a very secure Bitcoin wallet.

- Latest stable version: **31.1 (July 2026)** [BitTorrent]
- Release Announcement
- You *MUST* verify the integrity of this software before running it.
